

Speed Indicator Display (SID) Data Summary for March 2026 Meeting

The data shows once again that, despite the 'traffic calming' of multiple potholes, many drivers flagrantly disregard the speed limit through the village.

A slight change has been made to the analysis at the request of a local resident, 40+ mph summary data has been included.

The data also shows that there appears to have been some impact on the volume of traffic through the village as a result of the A267 road closure. In the second week of February there was an average of 2957 (weekdays eastbound) and 3527 (weekdays westbound) vehicles per day; whilst in the fourth week (when the closure on the A267 was in place) the averages were 3079 and 4185 respectively; the increase in eastbound traffic was small (~4%) but the increase in westbound traffic was more significant (~19%).
